PROFESSIONAL SUMMARY

I am a Software Engineering Technology graduate from Batam State Polytechnic with hands-on experience in Full-Stack Web Development through professional projects, internships, and freelance work. Experienced in developing responsive and scalable web applications using Next.js, React, NestJS, Laravel, TypeScript, JavaScript, PostgreSQL, and MySQL.

Strong in frontend and backend development, REST API integration, database management, and problem solving, with the ability to translate business requirements into effective digital solutions. Adaptable, fast-learning, and highly motivated to grow as a Full-Stack Developer while delivering reliable and impactful solutions for the organization.

Object Oriented Programming, AI , IOT, Web Development, Hardware Programming, Databases, Data Security, Software Testing, Algorithms, and Data Structures.

SMKN 7 Batam - Software Engineer **May 2019 – Apr 2022**

Relevant Courses: basic programming, Html, CSS, JavaScript, AngularJs, Basic Data SQL, OOP, PHP.

PROFESSIONAL EXPERIENCE

PT SMOE Indonesia (Seatrium) - IT Developer **Aug 2025 - Apr 2026**

- Developed and expanded a web-based Mechanical Completion Information System using the Next.js and NestJS frameworks and a PostgreSQL database.
- Designed and developed frontend and backend features as a Full-Stack Developer based on system requirements and company workflows.
- Developed and integrated RESTful APIs to enable data communication between the frontend, backend, and database.
- Designed and implemented responsive and user-friendly interfaces to improve data input and project monitoring efficiency.
- Managed PostgreSQL database structures, relationships, and queries to support reliable data storage and processing.
- Developed and enhanced system features based on user requirements and guidance from supervisors.
- Actively collaborate with the team and clients to analyze requirements, discuss solutions, and resolve issues throughout the development process.
- Conducted testing and debugging to ensure system performance and reliability

Base Incubator - Web Developer **Aug 2024 - Jun 2025**

- Developed an e-Learning platform for online tutoring courses using PHP, Laravel, MySQL, and JavaScript based on client requirements.
- Designed and implemented responsive web interfaces for course information, learning materials, and student progress.
- Collaborated with a backend developer to integrate frontend features with REST APIs and ensure smooth data flow.
- Implemented and refined website features based on client feedback and project requirements to improve functionality and user experience.
- Continued as a freelance Web Developer to further develop, refine, and complete the e-Learning platform according to client requirements.
- Used Git and GitHub for version control and collaborated with the development team throughout the development process.

Politeknik Negeri Batam, Android Developer **Jun 2023 - Dec 2023**

- Built and developed the Onicars mobile application from scratch as a car rental solution for Toko Ram Showroom, focusing on simplicity and ease of use.
- Developed the cross-platform mobile application using Dart and Flutter, with Firebase as the backend database.
- Designed and implemented application features based on client requirements and project objectives provided by the lecturer and mentor.
- Collaborated with a UI/UX Designer and Data Analyst to develop an intuitive interface and ensure the application met user and data requirements.
- Perform routine maintenance and bug fixes, and update applications according to changing needs or technology updates.

PT. Inforsys Indonesia, Web Developer **Jan 2021 - Apr 2022**

- Developed and improved the company's website interface to create a more modern, attractive, and user-friendly experience.
- Redesigned and organized landing page layouts to improve visual consistency, structure, and usability
- Implemented responsive web interfaces using AngularJS and Bootstrap to ensure consistent display across different devices.
- Enhanced existing website components and layouts based on company requirements and supervisor guidance.
- Collaborated with the development team and completed assigned tasks according to project requirements and timelines.

ADDITIONAL INFORMATION

- **Language:** Indonesian & English.
- **Certification:**
  1. Startup development by kominfo digital startup 1000
  2. Junior Coder Competency Certificate - BNSP 2022
  3. Certificate in Fullstack Developer Associate – CertNexus 2026
